# Equis.Metastock.v10.Working.rar Crack

Metastock Crack/Activation key/Mac Crack in a new and easy to use software. The software is a new tool from the Metastock Toolbox that was released.

**Equis.Metastock.v10.Working.rar.Q:** Creating a JavaScript object from a JSON string I am trying to create a JavaScript object with the JSON string in it. I've tried this: `var response = JSON.parse(data); var text = response.text; var tags = response.tags; var title = response.title; var description = response.description; var date = response.date;` But when I do a `console.log(text)` I just get this: `{"info":["Simulate the heat in Calgary, Alberta.,"Protect your home from the summer heat.],"location":["Canada","Calgary"],"tags":["Winter is coming"],"title":["Winter is coming","Protect your home from the winter`

---

heat"],"description":["Protect your home from the summer heat","Protect your home from the winter heat"],"date":["2019-01-24","2019-02-25"]}} Can anyone tell me what I'm doing wrong here? A: var text = response.info[0].text; Your JSON is an object: info: { info: [ ... ], location: [ ... ], tags: [ ... ], title: [ ... ], description: [ ... ], date: [ ... ]
