The upgrade to version 5 adds a new Photo Browser as well as a new option to replace the default rendering engine. The Photo Browser enables you to view thumbnails of images that may not be in the current catalog and compare tones for selection and color balance. The new engine, called the Unified Engine, doles out memory and CPU by keeping multiple versions of the same file. For example, the version you are viewing may have some modification and the main version of the image, because you were changing it. The Unified engine keeps both versions but only uses the most recent version unless there is a conflict, such as one or more of the mod changes in the memory. This enables faster saving and loading for the most recent edits, but requires more memory. For users with a lot of images, this might be a big advantage. "Unified Cache" can be disabled by clicking the "System Cache" button in the interface, which lets you switch from using the Unified Engine to Metal for faster rendering. Adobe offers an additional cache options, too, for **1 GB** and **2 GB** for the RAW format, which is great for users who shoot RAW files and prefer the fast, but lossy, Metal rendering, and are upgrading from a previous version. To work efficiently with the Photo Browser, choose a thumbnail size from the drop down box, and click the Edit > Preference... button. Set the number of thumbnails to show in the view to a good number for your images and always include thumbnails in the Photo Browser window when you are viewing images in Lightroom. The new independent flash preview option in the Image Editor is a nice feature. It allows you to see your adjustment when you are selecting and moving the Brush tool.

The latest version of Photoshop will have a new Photoshop CS7 feature called Photomerge, which is very efficient and can be used to merge a series of different photos together seamlessly. As opposed to the old version's Smart Objects feature, which does wonders for your overall editing or design, the new Photomerge feature seems to be more efficient and useful.
