**Hands Of Light Barbara Brennan Pdf PORTABLE**

---

A few years ago I was looking for something new in my work and my time, and I came across The Bow of Light. My clinic was going through some changes and I had been having trouble with my practice. I was almost ready to say goodbye to the profession, I was not sure that I could reinvent my life as a practitioner. When I came across The Bow of Light I realized that not only did I not have to leave the profession but that I could broaden and deepen the scope of my practice to include people from all walks of life. As I have done my own healing and transformation I have also been working with people from the spiritual and mystic realms. I could see a real need for therapists and healers that could do this, I could not find a therapist that would teach me how to do this. After seeking every possible healer that I had my eye on and watching them practice, I knew that the way I practice was the way I should practice. I had begun writing, what would be this book if not an exercise in healing modalities. I had never even thought of writing my own book, but there was a number of questions that I had asked myself and not really gotten an answer. One reason that Barbara Brennan uses the term the "hands of light" is because of her background and study of Agni Yoga. The theory of Agni Yoga is based on the sacred

Sanskrit verse, "the fire itself burns upon the invisible fire that burns in the heart of all beings." According to Agni Yoga, the human body is based on the Agni principle. Agni is the element or force in the human body which is produced and reproduced through metabolism. The human body is an electrical, energetic organism. Therefore, the healing process in Barbara Brennan's hands of light school of healing is based on the electrical, energetic, spiritual aspect of human beings. All humans are born with a chemical imbalance in their "electrical" energy, and they must have a healing process to release that imbalance.
