This would be a good time to actually walk through some actual community-contributed models that people have posted on SketchUp's site. Included below are several examples of VRay models that people have shared on SketchUp's website. So the code is also available here- https://github.com/cchauvign/vray_for_sketchup_2016.git. Just unzip the zip file, and run :vraybuild.bat./vray_for_sketchup_2016_geometry.dae. Check the section of this post that talks about it for more information. The creative team then transferred all of these images into SketchUp so they could see how the textures and visual effects would look in the model. Using the features of the new vray plugin, the rendering team wanted to more closely mimic the materials that are used in the built model. To that end, the creative team used a customized Unreal Engine 4 texture in conjunction with the vray plugin to simulate the materials.
