Download Atapwd 1.2 Hard Disk Password Utility

hdd unlock wizard is a user-friendly application which allows you to easily remove hdd passwords. ide and sata hard disk drives are supported. both user and master password can be removed. please note that while unlocking, hdd unlock wizard will erase and re-certify the drive, meaning to say all data in the disk is lost and not recoverable. hdd unlock wizard incorporates proprietary unlocking algorithms which allow removing an unknown hdd password and making the hard drive usable again. this is a fully featured password recovery utility that can be used to search for and remove a password for a hard drive or partition. the password can be removed for all disk drives including sata and ide. the master password will also be removed. the reason why we have set a hard disk password is to stop the hard drive from being accidentally wiped, but we also need to protect our hard disk in case it gets stolen. most of the time, a thief is also familiar with the hard disk password, as they usually know the contents of the hard disk, they can extract data from a hard disk drive without the password. so in order to protect our data, we need to encrypt the data and save the password to the hard disk, we need the password to access the encrypted data. although we can store the password in a file, by reading the file and entering the password when we try to access the encrypted data, the password file is

easily lost. thus, we need to store the password somewhere secure, like a hardware password. backed up passwords are easy to find. people that lost their computer, will often search for the hard disk, they will probably search for the hard disk password. so we can use the backed up passwords as an alternative to the hard disk password.
