However, it is unlikely you will ever need to go back and forward through your library, since you can access your music by simply tapping the Bluetooth music player icon on your mobile device. And, it is nice to see that Bose has paired the multi-airplay and Bluetooth functionality of the Apple AirPods with their portable speaker. The Rae Systems by Honeywell Wireless MultiRae Lite is a portable combustible gas detector that provides versatile, customizable detection and monitoring of up to six gases, available in both pumped and diffused air models. With more than 25 sensors to choose from the broadest selection in its class it can test for VOCs, combustibles and a range of toxic threats, as well as monitor sufficient oxygen levels, making it an excellent choice for personal protection and leak detection in a range of industries and applications. The Bose PortableSmart Speaker has Google Assistant and Amazon Alexa built in, but you can also play music from other sources, such as the Bose Music app. You can also use a Bluetooth connection, Spotify Connect, or Apple AirPlay 2. All these non-voice sources are available independent of whether the microphones are turned off or whether Google Assistant or Amazon Alexa are enabled. The Bose PortableSmart Speaker is the best-sounding smart speaker I've ever heard. It produces surprisingly spacious audio, including deep, rich bass, that spreads evenly in all directions so it envelops you from every angle. Its battery-powered, so you can easily bring it with you all around your home and ask Google Assistant or Amazon Alexa for music. And away from Wi-Fi, its still an excellent Bluetooth speaker so your sound can go wherever you go. 5ec8ef588b
