Use the Back-up feature to backup your current computer settings. * Are the drivers that ASUS Drivers Update Utility updates also the latest

ASUS Drivers Update Utility (Latest)

KEYMACRO is a powerful and easy-to-use mouse macro recorder. You can set up repeating mouse gestures which are recorded automatically and triggered by an external command. You can also add a macro to the F1-F12 keys and create a single macro to launch an application or open a file. The keystroke mapping can be customised to add or remove mouse buttons, mouse modifiers and keystrokes. The macros are saved as a file which can be edited in a text editor. When you save the file, KEYMACRO will automatically launch the software to enable the macro to be saved and activated. You can choose from several standard operating systems and switch the macro keystroke settings for different operating systems. You can also choose the keyboard layout for the saved keystroke. Learn how to use the keyboard to activate the macros. Then, learn how to set up a macro which will be triggered by one of the F1-F12 keys. FEATURES: Set up macros with the mouse buttons Record your macros and play them back Record your macros for F1-F12 keys Set a single macro to trigger an application, open a file or browse a web site Choose the operating system and keyboard layout for the macros Create or edit the macros with a text editor Restore the saved macro to a different keyboard or operating system CHANGELOG: 2008.03.24: Fixed a small bug which caused the recorded macro to not play back when the Macro File is saved. Thank you to: Alexander Nikita Zhuk Orsolya Hatton Aydin Uzum gwb1204 Vitor Stefano Puglisi 2007.10.16: New language file added 2006.10.03: Released version 0.5 06.08.2007: Initial release Skins.NET(R) - Skinning App for Windows(R) 7(TM) Skin your Windows(R) 7(TM) desktop to look like the latest version of Windows(R) 7(TM) -- from the current, to the classic, to the Aero(TM) theme and more. SxS skins can be installed on one or more computers at once. If you have both a PC and a Mac, you can easily take your desktop look from one to the other with ease. Aero Glass XP looks just like AeroGlass XP 7, but with a Windows XP look and feel. 2edc1e01e8

What's New In?

ASUS Drivers Update Utility is a free program that updates your driver on the devices that are currently installed on your computer. If you are looking for a way to install or update drivers with the minimum effort, this program is for you. The program scans your computer and lists all the devices that are installed, the type of hardware they are and the current version of the driver. After this is done, you will be presented with the drivers that need to be updated. There is a list of drivers that are out-of-date and the program will attempt to download the needed updates automatically. If you want to update only a single driver, you can do it in one click. And if you want to backup all of the current drivers, you can do this with just one click as well. Once you have the files you want, the program allows you to download them to your desktop or any other drive and use them at any time. Speedy Mouse is a program that will allow you to make your mouse work more quickly and easily, without the need of frequent driver updates. This program will monitor your mouse while you are using it. It will detect the most common mouse mistakes and can prompt you in the form of pop-ups that will help you to avoid them. It will also help you to set mouse gestures and shortcuts, and will warn you of when a gesture is performed. All the settings can be saved as profiles, allowing you to use them even if the computer is turned off. The settings can be also adjusted from the program, allowing you to adapt the mouse to your needs. You can also change the sensitivity of the mouse using this program, allowing you to customize it to your own needs. It is an easy-to-use tool that will make your mouse more effective and easier to control. What's new in this version: Added the option to change the mouse speed (quantization) Added the option to change the mouse sensitivity (quantization) Added the option to change the mouse gesture sensitivity Added the option to allow text selection using the keyboard Added the option to allow the scrolling of the mouse wheel using the keyboard Added the option to allow the copying of selected text using the keyboard Added the option to change the mouse pointer when moving the mouse Added the option to change the mouse cursor when moving the mouse Added the option to change the mouse pointer color when moving the mouse Added the option to enable or disable the auto-inclusion of text selection gestures Added the option to enable or disable the auto-inclusion of mouse wheel gestures Added the option to change the mouse cursor color when moving the mouse Fixed a crash that could happen when hovering over a group name Fixed a bug that could cause the mouse pointer to be displayed incorrectly if using the "restart
