If prompted, accept the certificate warning and proceed with the installation. If you have questions, feel free to email us at support@gkamus.com.Q: Images on all pages I'm currently working on a webpage that has about 7 different images on each page. Each image is contained in a div that is placed on each page using PHP. Is there anyway I can create a function that can be used to get the current page's image and then display it in the tag. A: you should be able to just assign your \$page to a variable in your function and then use that variable in the tag. function loadpage(\$page) { \$image = \$page. ".png"; echo ""; } In the woods of
