As mature as Photoshop Elements is (it must be nearly into its 20s as far as versions), Adobe keeps creating new features to incorporate. Often, Elements is given features before Adobe Photoshop and Adobe Photoshop Lightroom. Many of these new features are a result of Adobe Sensei Artificial Intelligence (AI) that allows otherwise complex manual tasks to be handled automatically. With fantastic toning, Adobe's latest update to Photoshop CC 2017 allows you to correct and easily get rid of red eye and other imperfections. Red Eye Corrector is a one click, point and click tool that removes red eye imperfections from photos and images with ghosting, too. The step-by-step HDR Toning Editor allows you to create sun-drenched skies, interesting clouds, and more with controls such as brightness, contrast (for more professional restoration) and alignment. Plus, new presets keep you up to date on your favorite landscape images and images of nature. With more than 170 presets, across four tone-mapping algorithms, you can find one for nearly all you need. Want to get a perfect shot of a black bear without getting a perfect shot? Using the new AE CS6 app, you can use the Spot Healing Brush to discover and fix parts of an image that are deformed. Even in low light, you can zap out the part of the scene that you don't want, then carefully paint in the part you do. There's also a new Noise Control tool, which reduces noise in photos that have too much to pick apart.
